

**Trabalho Prático #2***Professor: Omar Paranaíba Vilela Neto e Luis Filipe Vieira**Monitora: Aline F. F. Silva*

Antes de começar seu trabalho, leia todas as instruções abaixo.

- O trabalho pode ser feito em grupos compostos por até 3 alunos.
- Cópias de trabalho acarretarão em devida penalização às partes envolvidas.
- Entregas após o prazo serão aceitas, porém haverá uma penalização. Quanto maior o atraso maior a penalização.
- O objetivo desse trabalho é te familiarizar com a Linguagem de Descrição de *Hardware Verilog*. Será disponibilizado no moodle um arquivo .ipynb com uma implementação do RISC-V 5 estágios em Verilog. As suas tarefas nesse trabalho consistirão em alterar o caminho de dados fornecido a fim de incluir mais operações e módulos. É altamente recomendado executar esse arquivo no google Colab, sendo esta a plataforma que será utilizada para avaliar as submissões dos trabalhos.
- Você deve entregar um único arquivo zip, contendo um arquivo .ipynb com a implementação do caminho de dados com as funções pedidas a seguir, em verilog. Note que todas as funções devem estar no mesmo caminho de dados, ou seja, o trabalho é incremental, você deve entregar **somente um caminho de dados contendo todas as funções solicitadas**.
- Deverão ser implementados os arquivos verilog e os códigos de teste em assembly das instruções. As suas modificações podem ser feitas diretamente no código verilog fornecido. É recomendado que você mostre as formas de onda, assim como mostradas nos exemplos do arquivo .ipynb fornecido.
- No mesmo arquivo zip contendo o caminho de dados, você deve enviar um relatório, em pdf, explicando suas decisões de projeto e contendo **nome e matrícula de todos os integrantes do grupo**.
- **Cada grupo deve fazer somente uma submissão**. Ou seja, cada grupo terá um aluno responsável por fazer a submissão do trabalho no *Moodle*.

**Problema 1: ORI - Bitwise or immediate**

(5.0 pontos)

#Para mais informações sobre o funcionamento dessa instrução confira a documentação do RISC-V  
<https://github.com/riscv/riscv-isa-manual/releases/latest>

**Problema 2: SLLI - Shift Left Logical Immediate**

(5.0 pontos)

#Para mais informações sobre o funcionamento dessa instrução confira a documentação do RISC-V  
<https://github.com/riscv/riscv-isa-manual/releases/latest>

**Problema 3: BLT - Branch on Less Than**

(5.0 pontos)

#Para mais informações sobre o funcionamento dessa instrução confira a documentação do RISC-V  
<https://github.com/riscv/riscv-isa-manual/releases/latest>
